-

Tech Stack

Component	Technology
Backend	Laravel
Frontend	Bootstrap 5
Database	MySQL
Language	PHP 8+
ORM	Eloquent
Authentication	Laravel Built-In Auth
Optional	jQuery Validation, Datatables

Project Structure

```
app/  
├── Models/  
│   ├── Category.php  
│   ├── Product.php  
│   └── User.php  
├── Http/  
│   └── Controllers/  
routes/  
│   └── web.php  
resources/  
│   └── views/  
public/  
└── (assets)
```

Installation

Clone

```
git clone https://your-repository-url.git  
cd project-folder
```

Install dependencies

```
composer install  
npm install && npm run build
```

Setup `.env`

```
cp .env.example .env
```

Edit database credentials:

```
DB_DATABASE=laravel
DB_USERNAME=root
DB_PASSWORD=
```

Generate key

```
php artisan key:generate
```

Run migrations

```
php artisan migrate
```

(Optional) Seed sample data

```
php artisan db:seed
```

Start server

```
php artisan serve
```

Default Test Login

Role	Email	Password
Admin	admin@example.com	password
User	user@example.com	password

Seeder Data

Seeder generates:

- 10+ Sample Categories
- 50+ Sample Products

- Admin user
 - Normal user
-

Testing

php artisan test

Reporting Issues

If you face bugs:

- Create GitHub issue
 - Include steps, screenshots, and expected output
-

Contributing

Pull requests are welcome.
Follow:

- PSR-12 Coding Standard
 - Laravel conventions
-
